

My layout is a decent sized L-shaped TTRAK layout that fits on 2 6ft folding tables. It isn't modeled in a particular location nor time period, though I prefer to model the 1930's-1960's. Currently it has a small yard for rolling stock storage and engine service tracks as well as a coal mine for coal service. By the end of next year I plan on having its final phase of construction completed to allow for more Industrial operations.
